Caritas Eco Review May 2024

We hope you find this tool helpful to look at the environmental activity already happening in your parish. For some, you may already being doing lots of what is on the list, others may just be starting out. We have included lots of links to information, resources and projects to support your journey. Additional sections will be added soon.

It would be great to see your completed reviews as this helps us build a picture of what is already happening in the Diocese and whether there are any specific resources or guidance that is needed. You can email you completed forms to caritas@portsmouthdiocese.org.uk
